### ArbiterGame

Get your game on.

Designed for School Athletic Departments, ArbiterGame gives athletic directors that competitive edge when managing their school athletics program. ADs can schedule games, manage teams, create rosters, arrange transportation, change venues and times, send important notifications, review opposing crews, pay officials and other game staff electronically, and track the entire process online from start to finish.

# STAY ON TOP OF THE GAME

Schedule all aspects of your game. Anticipate and prevent scheduling conflicts and other surprises by:

- Managing a working schedule that is private until you mark it public, at which time it is published to parents, students and fans

- Sending out automated alerts like game schedule reminders and game change notifications

- Entering all game details once and automatically updating opposing teams, assigners, facilities

- managers, staff, officials, parents, players, and the media

- view the master list of all games and filter it by sport, team, date range, and more

- check the status of each item, including following with the color-coded symbols next to each item

# ENTER THE ROSTER

When it comes to scheduling facilities and transportation, ArbiterGame is on your team.

- Check facility availability, submit usage requests and specify start and end times.

- Enter transportation information, including school release time, departure time and return time.

- Send email notifications automatically to your transportation director.

- Integrates seamlessly with FSDirect™ from SchoolDude.
