### ArbiterOne

Whatever your game, get the best equipment.

As the easiest and most efficient way to manage and assign officials, the ArbiterSports™ assigning system, ArbiterOne, has led the industry since 1984. Nearly 4,000 leagues and associations ranging from 6 to 21,000 officials currently trust the system to manage every detail of 5 million annual assignments.

This is the choice of officials too, because ArbiterOne is so widely used, our officials are already using ArbiterOne with other groups and like being able to manage all of their assignments and business in one place.

ArbiterOne connects the communication between assigners, leagues, teams and officials, allowing everyone to control the information and share it with those that need it.

Minimize mistakes and confusion because ArbiterOne lets you:

- Get a complete view of all your officials, their availability, contact information and pictures
- View and print your current assignments, communicate via email, or your entire roster, or any combination of it

Anticipate and prevent scheduling conflicts and cancellations with:

Automated game schedule reminders, game change notifications and other critical alerts for all your officials

Manual-Assign, Auto-Assign, and Self-Assign choices, depending on how much control you want over the assigning process

The ability to provide all necessary game-related information, including maps to the game sites, and the correct location, game rules and more. You can even input travel constraints or create profiles for each official.

# PAID ON

Now everyone gets paid correctly and on time, and you automatically:

Comply with your tax requirements

Track game fees and generate pay sheets

Process and distribute 1099s or let ArbitrOne take care of it for you

Includes travel reimbursement

Provide pay checks to club and league

# 24/7 TRAIN

On-line access means:

Officials manage assignments and post them available through a centralized portal

Officials access assignments and assign them to groups, schools and leagues

# HOW DID THE GAME?

Automatically generated evaluation reports track and monitor the quality of service provided:

Catch problems early on with standard templates or customizable forms

Collect evaluations from coaches, peers or observers

Report ejections, sportsmanship, and other incidents
